

TickKillz™ vs. Ticks

Controlled Environment (Lab)

- Tested against 72 female and male deer, dog, and brown ticks
- Ticks placed on white plywood, sprayed using label mix and app rate
- Observed ticks dying in 18 - 120 minutes ; all ticks verified as dead

Uncontrolled Environment (Field)

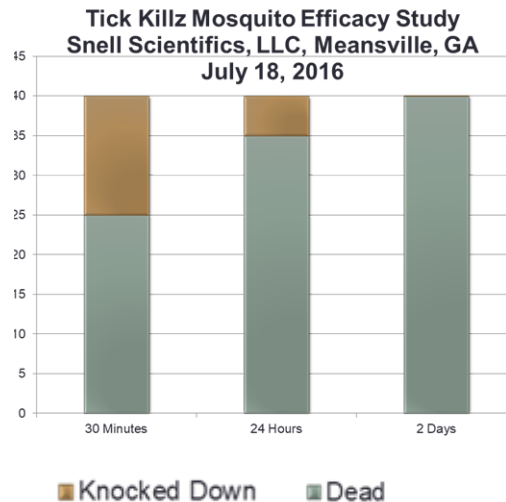

- Five separate sites tested in Newtown, Woodbury & Goshen, CT
- Tick drags performed to identify tick population, treated with Tick Killz™ then dragged approx one month later; total tick reduction of 92%

Why Use Tick Killz™?

- 100% All Natural product for ticks, mosquitoes, fleas and other small nuisance insects
- Controls insects on contact and repels for an average of 30 days after each treatment
- Liquid spray applied to lawn, bushes and wherever insects are found

TickKillz™ vs. Mosquitoes

100% Natural, Safe for Use

- 25(b) exempt; no EPA pesticide registration number
- Won't harm beneficial insects such as pollinators, butterflies, earthworms, etc.
- Dries clear; won't stain foundation, pavers, siding, etc.
